BIGGEST BUCK OF YOUR LIFETIME!!

THIS FALL IN TEXAS

Have you ever dreamed of killing a monster whitetail buck? I don't mean a big one, I mean a monster!

Texas Hunting Services has the hunt for you. South Texas is noted for low brush, dry weather and huge whitetail bucks.

We have in excess of 125,000 acres for booking hunts. Our most popular ranch for hunts (approximately 30,000 acres) prior to fall '75 had not been hunted for forty years. Last year hunters reported seeing 20-25 bucks every day. Almost every hunter got a buck with a 20 inch spread or better. The exceptional rains in this area this spring and summer should make the fall of '76 the best year yet.

The cost of the hunt is $550 for a three day hunt. Hunts are being booked on the following dates: (1) Thursday, Dec. 16th; (2) Sunday, Dec. 19th; (3) Wednesday, Dec. 22; (4) Monday, Dec. 27th; (5) Friday, Dec. 31st. Hunters will be booked in groups of two to four and be assigned a pasture of 1,200 - 2,000 acres. In this pasture, hunters will sit, walk, climb, or drive to take their trophy buck. Many organizations and publications have billed this ranch as the best in the world to kill a monster whitetail buck. Openings are limited so interested groups are urged to make reservations without delay. Deposit — $250.00.

What is Texas Hunting Services?

Texas Hunting Services was formed to fulfill and assist the needs of resident and non-resident hunters in Texas. Each year it becomes increasingly difficult for the average sportsman to locate good hunting properties. Many hours and dollars can be spent in search of the right place. And even after this searching the sportsman may still wind up with a bum-steer. The staff of Texas Hunting Services are dedicated to researching and studying Texas hunting opportunities 12 months a year.

During the year a close relationship between ranchers and biologists in all areas of Texas helps Texas Hunting Services to make accurate choices of those ranches and areas of Texas most likely to produce quality game for a limited number of individuals. Hunts are then established and made available to the sportsman. Hunts vary in length from three days to all season depending generally upon biologists recommendations and availability of game.

Persons interested in hunting any native or exotic game in Texas can be assured of a quality hunt with "Texas Hunting Services."
